**Real Value Where It Counts**

# Communications Services

**Henkels & McCoy has your Communications Services needs covered...**

Henkels & McCoy is an established leader in telecom infrastructure construction work. We got our start erecting poles and running phone lines back in the 1920s. Today we work with carriers, operating telcos, utilities, national, state, and local government, the military, and private industry to bring the latest technology and broadband services to business and consumers for our outside plant market. We have grown with the times and with our customers. Our formalized commitment to project management exemplifies the dedication to innovation and industry leadership that has always been our calling card. We enjoy a well-deserved reputation for delivering real value where it counts.

### Areas of Expertise:

Henkels & McCoy's areas of expertise include project management, feasibility studies and financial projections, and planning and scheduling. Henkels & McCoy is expert in engineering and construction services, system integration, start-up and testing, plus service and maintenance. Full turnkey projects are a specialty of Henkels & McCoy, and we also include subcontract review and supervision, and staff augmentation among our many strengths.
