

Real Value Where It Counts

Wireless Technology:

Our full range of services includes:

- Construction
- Overall Project Management
- Engineering Support for Site Acquisition and Zoning
- Site Engineering
- Design
- Civil
- Testing
- Fiber Optic Backbones
- All Wireless Voice and Data Applications
- Line and Antenna
- Network and RF Electronics
- Cellular
- Microwave Systems

Henkels & McCoy offers the latest solutions in Wireless Technology, combined with nearly ninety years of telecom experience.

The wireless industry has evolved from voice-only convenience to the provision of essential voice, data, and video services for both outside and inside deployments. Henkels & McCoy provides key services to design and install critical infrastructure for public and private wireless networks that support increasing demands for communications

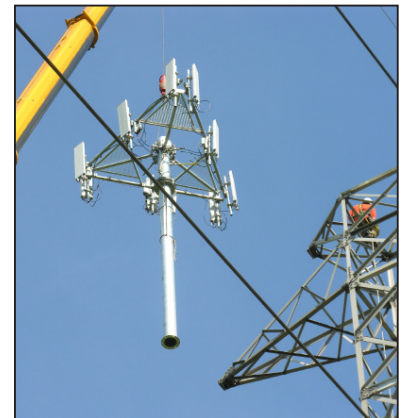

and workforce mobility. Our work includes traditional cellular site, inside applications, and WiMax deployments. We execute difficult site installations including rooftops and in remote areas with alternative power sources.

We provide a single source of power and communications installation resources. Our outside plant engineering and fiber installation provides a reliable single source service for the planning and construction of fiber backhaul and Distributed Antenna Systems (DAS) to support increasing demands for new technology and applications.

Full installation capabilities — new or upgrade. (Above and below;) Wireless antennae installed atop existing power transmission lattice towers. Shown at left is a completed Wireless tower. H&M brings value, experience and versatility to all Wireless projects.

Our ability to work on power company facilities benefits our customers.

Who We Are

Henkels & McCoy is one of the largest privately held firms serving the communications and utility industries and consistently ranks at the top of the Engineering News-Record list of Specialty Contractors. With approximately eighty offices and operations centers strategically placed throughout the United States, more than 4,000 employees and 6,000 pieces of equipment, our ability to quickly mobilize and provide turnkey solutions is unsurpassed.

Why Henkels & McCoy

Innovation / Experience Expertise / Training

Wireless technology is growing more advanced and complex on a daily basis with system upgrades and new coverage installations. Our professionals are Anritsu / AT&T / Nortel / Lucent / Qualcomm / Erickson / Euijon / Andrew / Comscope and Nokia trained.

National Footprint

Henkels & McCoy has offices strategically located throughout the United States capable of handling any aspect of your wireless project. Our customers benefit from consistency of standards and practices and unsurpassed communication.

Safety

Much more than a program or function, our safety initiatives are an intrinsic part of our culture, and a daily reminder to our employees that safety consciousness begins with them and surrounds each task, the job site and beyond. We have earned numerous safety awards in recognition of our efforts. We are especially proud of the Liberty Mutual Gold Award we earned for our efforts in safely restoring communications infrastructure at the Pentagon following the 9/11 attack.

What Gets Measured Gets Done

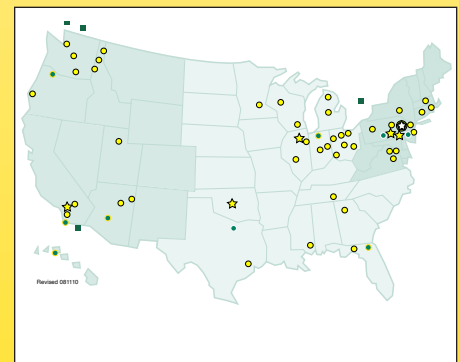

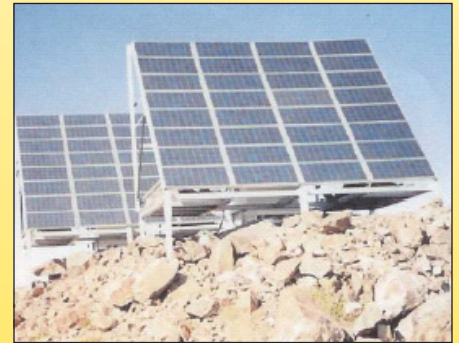

Designed for e-business, our Work Order System integrates project management, financial accounting, and productivity tracking to ensure the highest levels of quality, performance, and efficiency.

Quality

Our Corporate Performance Department exemplifies our investment in excellence. This unit oversees our performance, productivity, quality, and customer-relations initiatives. Goals are realized through customer surveys, project performance appraisals, and the development of metrics and best practices designed to stimulate *Peak Performance*.

Expanding the reach of communications with installation in remote areas.

National footprint: Henkels & McCoy's three operating regions, from New England to Hawaii, have a combined national presence of over 80 offices.
