

Water Industry Expertise

Henkels & McCoy has years of experience in pipeline, rock trenching and excavation, and service and maintenance.

PERFORMANCE
has built our business...®

Henkels & McCoy has performed a wide variety of water related installation, maintenance, and emergency response services for customers from coast to coast. Our experience in rock trenching and excavation has proven invaluable when installation of new mains and services or the upgrade/extension of existing systems is required.

Our vacuum excavation services handle utility location, identification, protection, repair, and maintenance needs with peak efficiency. The rig utilized is ideal for repairing underground utility lines and installation, and renewal of cathodic protection systems. This method results in minimum pavement or sod removal, less traffic disruption, and reduced impact on the environment.

WATER INDUSTRY SERVICES

- **Installation of new water distribution main (4" to 24")**
- **Installation of new water transmission supply pipelines to 36"**
- **Replacing/renewing new water mains and services**
- **Operating well – casing video inspections**
- **Intrusion security**

Water Industry Expertise

The Environment,
Directional Drilling
and
Henkels & McCoy

Henkels & McCoy brings years of practical experience to bear on all drilling

Directional Drilling Expertise

In highly sensitive environmental areas, our extensive understanding of directional bore technology has proven a significant benefit to our customers – and their customers. A prime example was our successful negotiation of a 1,280-foot crossing of a saltwater channel for a potable drinking water supply for the City of Anacortes, Washington. Our performance on this project, which was completed ahead of schedule and under budget in an area supporting threatened and endangered salmon species, was commended by the environmental engineering, construction, and water resource management firm brought in by the customer to monitor the project based on their observation that no environmental impacts to the water channel or wetlands occurred.

Safety

From the beginning, our philosophy has been that safety represents a commitment to protect our employees, customers, and the public. Our systematic approach to safety has received recognition from:

- The National Utility Contractors Association
- Pipe Line Contractors Association
- Mechanical Contractors Association of America
- Texas Safety Association
- Liberty Mutual Insurance Company.

Celebrating 80 Years of Continuous Performance

Founded in 1923 and headquartered in Blue Bell, Pennsylvania, Henkels & McCoy is one of the largest privately held firms serving the utility and communications industries, consistently ranking at the top of the Engineering News-Record list of Specialty Contractors. Built on an unwavering commitment to safety, quality, and performance, we provide engineering, construction, installation, project management, maintenance, and training services through over 70 coordinated locations nationwide.
