### **Henkels & McCoy, Inc. Acquires In-Building-Wireless**

**Henkels & McCoy, Inc.**, through its national wireless networking design and integration division, **H&M NetWorks**, announces that it has acquired In-Building-Wireless, Silver Spring, Maryland. In-Building-Wireless, a pioneering firm in the rapidly expanding Distributed Antenna Systems market, brings more than a decade of experience in the cellular and wireless markets, and a customer base of over 1,000 projects and sites. For the past several years, H&M NetWorks has collaborated with In-Building-Wireless through joint initiatives in the carrier, federal, and enterprise markets. Mark Lehman, VP, H&M NetWorks notes, "In-Building-Wireless has a design and engineering team that is second to none, and we both have enjoyed our collaboration in solving some of the most complex networking requirements."

"Henkels & McCoy is the ideal match for our firm's explosive growth that we are experiencing in the cellular market. Our combined experience and national network of technicians and network engineers will enable wireless carriers and Fortune 500 companies to roll out complex wireless solutions over the entire U.S. footprint with top-notch project management," said Shawn Thompson, co-founder, In-Building-Wireless. Peter Murray, H&M NetWorks' Wireless Program Manager states, "Our wireless program focuses on enhancing the mobile broadband infrastructure needs of our carrier partners, as well as our government and commercial customers. We're making 4G wireless and beyond a reality by providing the capacity and coverage so vital to a mobile society."

#### **About In-Building-Wireless**

Established in 1999, In-Building-Wireless provides the design, project management, installation, and certification expertise essential to the success of each and every project. Its industry leadership and expertise has allowed them to work with such notable clients as American Institute of Architects, Sprint-Nextel, Verizon, T-Mobile, AT&T, American Tower, Tyco, Commscope, Corning, and others.
